MAJOR COURT RULINGS ON LABOR CASES IN KOREA

A collection of legal interpretations of Korean labor regulations

그림

Foreword

In line with today's dynamic globalization trends, a growing number of transnational companies are operating here in Korea. As a consequence, foreign investors and their Korean operations have become significant players in the Korean economy. Yet a number of these firms have encountered problems when handling labor issues, in part due to their lack of understanding and knowledge on domestic labor practices, systems and regulations.

This book, which includes explanatory notes and practical tips on labor law provisions and relevant court rulings, is the latest addition to Invest Korea's efforts to help foreign investors manage difficulties in dealing with labor or personnel issues.

I wholeheartedly believe that this publication will be of much assistance to foreign-invested companies and their human resource officials. And I would like to express my sincere appreciation to our dedicated team of labor specialists who have collected and edited the necessary materials and data for this publication.
